
Google Cloud Print

With Dick Evans at the Computer Club 3-6-2018

Print Where?

Google Cloud Print is a technology that allows you to print over the web from anywhere, including your phone, to any printer.

Works across Google

Why use Cloud Print?

- It's safe and secure

Your documents are deleted from Google's servers once printing is complete.

- It makes sharing easy

Share printers you own with trusted individuals.
