

Meeting Notes 5-1-2018

Inactive Windows Scrolling

We are used to having to click on a window to bring it to the front to be able to scroll in that windows. We click to bring it forward and the other window(s) go into the background. In Windows 10 we just have to mouse over the window in the background to scroll without making that window active.

Win+I > Devices > Mouse, then make sure Scroll inactive... is On.

Mouse

Select your primary button

Left ▾

Roll the mouse wheel to scroll

Multiple lines at a time ▾

Choose how many lines to scroll each time

Scroll inactive windows when I hover over them

Toggle color on and off in Windows 10

Ctrl+Win+C

Rotate the screen with Ctrl+Alt+arrow keys

Open Chrome Web Store

Change in how to **add an extension in Chrome**. Click the menu button (upper right three dots) and choose More tools > Extensions. Click the menu button (upper left three lines). Scroll to the bottom and select Open Chrome Web Store.

Popular extensions: Adblock **and** Show and Hide Passwords

Storage sense

Windows can automatically free up space by getting rid of files you don't need, like temporary files and content in your recycle bin

[Change how we free up space](#)

Free up disk space automatically on Windows 10 with Storage Sense.
Win+I to open Settings > System > Storage

Free up space now

If you're low on space, we can try to clean up files now using the settings on this page.

Clean now

Win+I to open Settings > System > Storage > Change how we free up space

1803 update note... Allows cleaning up a larger number of files including no longer needed windows update files.

What's the Difference Between **Hibernate and Sleep?**

Hibernate: writes RAM to disk and then turns off the power

The contents of RAM are written to disk. All the loaded and running programs are included in the exact state they happen to be in, including any data they've initialized and maintained.

Sleep: keep RAM in RAM and power is left on at a low level. The battery is being used so do not do when not plugged in.

1803 update note... when an update is ready to come down Windows will not allow sleep mode to start

Snipping Tool vs Paint

The Snipping Tool comes bundled with Windows free of charge and so does Paint. A look using both <http://tinyurl.com/ycgp49lx>

Another 1803 update... **Password Recovery** for local accounts
