

A free search tool for Windows

Everything is a system utility software that can help you find any file or folder stored on your Windows device. It works blazingly fast and provides users with results in real-time. While the Everything search app doesn't do anything other than search for data, it does this efficiently and without using too many system resources.

The latest version of the Everything app for Windows works with 32 and 64-bit versions and is easy to set up and use. It offers several search-focussed features that help find documents, images, videos, and audio files quite easily. Users can even customize the software based on individual preferences.
